LAMBS DROPPING AT KANSAS CITY

SCARCITY OF SHEEP IS REPORTED ON FARTHER EAST.

In Cattle Stockers and Feeders Sell Slightly Better, But Without Any Special Rush—Grass Stock From Several Western Markets Tend Towards Pulling Down the Prices.

Correspondence The Sun.

KANSAS CITY, Mo., July 19.—A quarter to fifty cents was taken off cattle values last week, due to the advent of a large delegation of grass cattle at Western markets generally. Prime fed cattle suffered somewhat in the general slump. Receipts here today are about eighty-five hundred head, of which sixteen hundred head are yarded in the Southern division, and the drop in the supply since last Monday, when thirteen thousand head arrived, resulted in an active market and considerable recovery in values. Prime steers, including numerous lots from Clinton county, Mo., the great corn and blue grass section, brought \$9.35 to \$10.10, on a parity with a week ago. A drove of one hundred head of yearlings from the same section, of which eighty-two were better, brought \$9.25, 830 pounds average. Greenwood county, Kan., steers climbed back up to \$8.40 today, about as good as the best time last week. Texas steers in the native division brought \$7.39 for which \$7.49 would have been the price last Thursday. The rank and file of cattle moved at slightly better prices than the middle of last week. South Texas grass steers sold in the quarantine division at \$8.40 to \$11.50, and Oklahoma grassers weighing nine hundred pounds at \$4.40 were considered higher than they would have sold last Thursday. Ten loads of R. E. Gatewood's steers, around twelve hundred pounds, from North Texas, brought \$8.40 in the quarantine division. Stockers and feeders sold slightly better, but without any special rush.

In the hog yards the supply was five thousand head, market steady to five lower for an hour or two, during which time order buyers made their purchases, up to \$7.70, including choice heavies at \$7.65. Packers bid ten to fifteen cents lower prices, paying \$7.35 to \$7.50 for the most of their hogs, around \$7.30 for rough heavy weights. Provisions prices have sharply declined recently because of England's interference with shipments to neutral countries, and recent weakness in hog prices is traced to that cause. Prophecy is made that hog prices will decline still further added by the rule of international laws and ceases to interfere with shipments of food products, which laws the state department at Washington, D. C., is demanding shall be enforced.

Sheep and lamb receipts are six thousand head. Lambs dropped close to \$1.30 in value last week, but sales today were still lower, to \$7.50 paid for several strings of Arizona spring lambs. Sheep prices are holding up \$8.50, 110 pounds average. Aged sheep prices are considerably above Chicago, because of scarcity here. Demand for breeding sheep and feeding lambs is developing, and promises to be very heavy. Recently there has been practically nothing in either line offered, a few feeding lambs today at \$7.25.

Cattle From Honduras

EAST ST. LOUIS, Ill., July 16.—The first consignment of cattle ever received here from Honduras was sold to local packers today. The lot of seven hundred head sold at \$4.40 a hundred pounds. This was the first part of a batch of six thousand head bought by a local concern in Honduras. The cattle were fattened in Guatemala. The laws of Honduras limit the number of cattle which may be exported to six thousand a year.

Big Ram Sale Coming Off.

R. W. McClure of the National Woolgrowers' association is printing three thousand copies of the catalogue of the first ram sale to be held at Salt Lake City September 7th and 8th, next, when three thousand rams are to be auctioned under the direction of the association, at the state fair grounds with Lewis Lincoln of Milford Center, Utah, auctioneer. Registered stud sheep will be sold in lots of one, and range rams will be sold in lots of twenty-five to fifty head. The catalogue is of twenty-four pages, and profusely illustrated with half tones of the best rams in the Western country.

Twenty-Nine Cents For Wool.

Montana wool is bringing a record price, according to reports received at Salt Lake City. More than a million pounds of wool have been sold in that state already this season, the price ranging from twenty-four cents to twenty-nine cents a pound. John D. Wain of Lewiston, Mont., received twenty-nine cents for his clip, which amounted to two hundred thousand pounds.

Other prominent woolmen of the Copper State who have sold their clips for twenty-eight cents are Perry W. Hammon and Jim Wilson. Together they have sold three hundred and fifteen thousand pounds. Several sold their clips for twenty-seven cents, including Ben Phillips of Phillips county, two hundred thousand pounds, and others.

Rates East Still Suspended.

Further suspension in the proposed advance on live stock rates from intermountain territory to the Eastern markets was announced Saturday by R. W. McClure, secretary of the National Woolgrowers' association. The report came from the interstate commerce commission at Washington, D. C., and stated that the rates would be suspended until September 1, 1915. This advance rate amounts to \$4.40 to \$11 a carload and was proposed by the Western railroads in April, 1914.
